# EXINN Background

**EXINN TECHNOLOGY CENTER LTD** is a knowledge company focused on research, engineering, innovation, protection, leverage and commercialization of intellectual property assets.

Established as a Limited Company in 1999. Headquartered in Tirana, Albania. With over 10 representative and affiliated branches in the world. More than 30 staffing experts based in EU, and South East Asia.

Currently we are the owners of more that **20 worldwide** patented inventions.

In our innovation pipeline we have **3 patent pending** inventions and more than **10 products (inventions)** under development.

## OUR MANAGEMENT: WHO IS WHO

### Andrea Papa

Bio: 30 years in Industry Research , Invention, Branding, Product strategy & Globalization

Chairman, Founder

### Perparim Gjeka

Bio: 25 Years In Industry – Technology Approach, Engineering, Investor Relation.

President, Partner

### Endri Bahja

Bio: 15 Years In Industry, Corporate Management, Financial Engineering, Innovation Auditor, Strategy & Innovation.

CEO, Partner

### Bledar Troka

Bio: 20 Years in - Banking, Financial and Trading Strategy.

CFO, Partner

### Josif Karaj

Bio: 10 Years in Marketing, Sales Strategy and Social Media

CMO, Partner

### Elona Faruka

Bio: 25 Years In Intellectual Property, Innovation, Leverage & Commercialization,

CIPO, Partner

### Dorian Cara

Bio: 15 Years in Operations - Communication. Marketing. Customer services. Quality Assurance

COO, Partner

## VISION & MISSION

**EXINN's VISION** is to empower and enrich the humanity with innovations that truly matter.

**EXINN's MISSION** is to maximize the human potential for our customers with our innovations so they can flourish, thrive and build their future together.

# EXINN

## OUR CORE VALUES

**EXPLORERS:** Science is in our DNA. We explore every possibility in our ventures through a systemic examination and investigation.

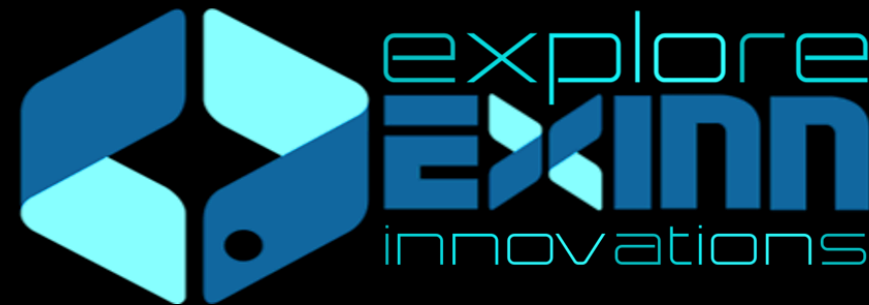

**INVENTORS:** The power of imagination is our driving force. We love to disrupt the known and produce the unknown by the use of ingenuity.

**INNOVATORS:** We fall in love with the problem. Our solutions for the market bring the passion to live with added value novelties that satisfy the needs of our clients.

# EXINN

## INNOVATION DEVELOPMENT LAB

**EXINN's Innovation Laboratory** serves to research, design and experiment our newest ideas on different sectors of smart energy solutions, food innovation, health technology, agro technology, future of transportation, fitness and sport technologies.

# EXINN

## OUR INNOVATION PORTFOLIO

In our LAB we offer to our clients a complete lifecycle service from conceptual design to the delivery of market-oriented technology. Our work is related with the development of the proof of concepts, laboratory research, experimental product/service design, prototype testing, scientific and field research for small, medium and large enterprises.

Currently, we are the owners of 20 worldwide patented inventions in the field of agriculture, transportation, waste, sports and fitness.

In our innovation pipeline we have currently under development 3 patent pending inventions and more than 10 products (inventions).

## OUR CURRENT PROJECTS

1. **Agrotech 2.0 in Albania:** Developing and implementing the most innovative solution in Precision Agriculture, Soil Scanning, Soil Testing and Smart Nutrient Farming.
2. **MilkingWay:** Providing Agrotech Solutions for Global Farms by developing and patenting an intelligent system and method for eliciting milk from mammals. The first seminal breakthrough in the last 80 years. Patent Number: WO2008090386
3. Developing an **Water Treatment System** used in crops and agriculture that is capable to modify and control the structure of water at Ph level and Dissolved Oxygen for long periods. Patent Number: WO2018131056.
4. Developing an **Unified Fire Protection Unit and System-UFPUS**. Prototyping an AI system and method for fire identification and extinguishing in real time that is used and applied in the agriculture and forestry sector.

There are two products that we are currently developing as part of the governmental national support grant scheme for innovative products, services and solutions.

We are involved in experimenting a [phytoremediation technological process/product](#) through a special variety of hemp (roots) that will be used in three selected Albanian farms to improve their soil structure and to naturally decontaminate their soil. This will provide better farming by increasing the efficiency and yield for the farmers.

# EXINN

## OUR HEMP NEW PROJECTS

Another product that is being developed is the production of hemp eco-pellets that in our case are produced from the whole **hemp 100% biomass** that is outsourced from several certified suppliers.

These hemp pellets in our case will be used as an excellent alternative heating material for several pilot housing units in Tirana.
